Ethics Education and Scientific and Engineering Research: What’s Been Learned? What Should Be Done?

Summary of a Workshop at the National Academies Keck Center, August 25–26, 2008
The National Academy of Sciences is a private, nonprofit, self-perpetuating society of distinguished scholars engaged in scientific and engineering research, dedicated to the furtherance of science and technology and to their use for the general welfare. Upon the authority of the charter granted to it by the Congress in 1863, the Academy has a mandate that requires it to advise the federal government on scientific and technical matters. Dr. Ralph J. Cicerone is president of the National Academy of Sciences.

The National Academy of Engineering was established in 1964, under the charter of the National Academy of Sciences, as a parallel organization of outstanding engineers. It is autonomous in its administration and in the selection of its members, sharing with the National Academy of Sciences the responsibility for advising the federal government. The National Academy of Engineering also sponsors engineering programs aimed at meeting national needs, encourages education and research, and recognizes the superior achievements of engineers. Dr. Charles M. Vest is president of the National Academy of Engineering.

The Institute of Medicine was established in 1970 by the National Academy of Sciences to secure the services of eminent members of appropriate professions in the examination of policy matters pertaining to the health of the public. The Institute acts under the responsibility given to the National Academy of Sciences by its congressional charter to be an adviser to the federal government and, upon its own initiative, to identify issues of medical care, research, and education. Dr. Harvey V. Fineberg is president of the Institute of Medicine.

The National Research Council was organized by the National Academy of Sciences in 1916 to associate the broad community of science and technology with the Academy's purposes of furthering knowledge and advising the federal government. Functioning in accordance with general policies determined by the Academy, the Council has become the principal operating agency of both the National Academy of Sciences and the National Academy of Engineering in providing services to the government, the public, and the scientific and engineering communities. The Council is administered jointly by both Academies and the Institute of Medicine. Dr. Ralph J. Cicerone and Dr. Charles M. Vest are chair and vice chair, respectively, of the National Research Council.

WORKSHOP PLANNING COMMITTEE

JOHN F. AHEARNE, NAE, chair, National Academy of Engineering Center for Engineering, Ethics, and Society Advisory Group; director, Ethics Program, Sigma Xi, The Scientific Research Society
FRANCISCO J. AYALA, NAS, member, NAS Committee on Science, Engineering, and Public Policy; University Professor and Donald Bren Professor of Biological Sciences, Department of Ecology and Evolutionary Biology, University of California, Irvine
KATHLEEN FLINT, director, Bring RCR Home Project of the National Postdoctoral Association
MARK S. FRANKEL, director, Scientific Freedom, Responsibility and Law Program, American Association for the Advancement of Science
FELICE LEVINE, executive director, American Educational Research Association

Principal Support Staff

RACHELLE D. HOLLANDER, director, National Academy of Engineering Center for Engineering, Ethics, and Society
RICHARD BISSELL, executive director, National Research Council, Policy and Global Affairs
CECILE GONZALEZ, program associate, National Academy of Engineering Program Office (until mid-August 2008)
KATHRIN HUMPHREY, associate program officer, National Research Council, Policy and Global Affairs
JACQUELINE MARTIN, senior program assistant, National Academy of Engineering Awards Program
## Contents

1. Introduction .................................................. 1
2. The Environment for Science and Engineering ............ 5
3. Ethics Education in Science and Engineering ............. 11
   - Approaches to Ethics Education, 11
   - Characteristics of Effective Ethics Education, 14
4. Models and Resources in Ethics Education ................. 17
   - Instructional Approaches, 19
   - Institutional Approaches, 22
   - Instructional Resources, 27
5. Assessment and Evaluation of Ethics Education and Mentoring ...... 30
6. Conclusion—What’s Next? ..................................... 35
7. Appendix .................................................... 43
   - Workshop Agenda, 43
   - Workshop Participants, 46
