

Aligning Industry and Academia at the American Nuclear Society (ANS)

Daniel Carleton

Treasurer: ANS Education, Training, and Workforce Development Division

December 6th, 2018

American Nuclear Society: Overview

- ANS a not-for-profit, international, scientific and educational organization that unites professionals who work in nuclear-related fields
- Mission: Advance the development and application of nuclear science, engineering, and technology to benefit society
- Hosts numerous events nationwide enabling collaboration between industry and academia

ANS Conference on Nuclear Training and Education (CONTE)

- Focuses on the future of the nuclear industry, and is aimed at training, education and workforce development
- Next meeting will take place February 5-7, 2019 in St. Augustine, FL
- Examples of activities that align industry and academia
 - *International Nuclear Management Academy (INMA)*
 - *UT Transformation of a Nuclear Engineering Department*

Industry, University, Government Relations Subcommittee

- Convenes as part of ANS national meetings
- Provides a platform for members of academia to inquire about how they can be more aligned with industry needs
- Opportunity for government officials to promote funding opportunities which industry and academia can pursue together
