

Dear CAETS members,

On Monday 23, Tuesday 24 and Wednesday 25 November 2020, the Mexican Academy of Engineering will hold the International Congress "Engineering and Public Policies".

The Congress website is: www.aicongreso2020.com

The website has information regarding the opening, master conferences, round tables, talks, musical program, conclusions, recognition of the exhibition of technological solutions developed by engineering students and postgraduate engineering, as well as **registration** for the International Congress.

It is a great opportunity to reflect on the measures and directions that engineering companies should take in economic recovery, in the attention of the scientific and technological development of industry, natural resources, energy, water, health, education and the general welfare of the population.

The International Congress of the Academy will take place virtually. There will be simultaneous Spanish-English-Spanish translation. It is the opportunity to attend conferences, participate in conservatories, see videos of activities of National Research Centers, listen to concerts specially performed for this Congress; all recorded and accessible on the congress page. You can have Memories edited in digital format and with virtual access, as well as proof of participation. There will be access from your cell phone or computer for each of the Congress events.

In this context, we request in the most careful way, disseminate this information among its members.

In the case of representatives of Academic members of CAETS and engineers who are part of said academies, to participate in the Congress, the payment of any recovery fee will not be required.

Any doubt or clarification to this email please.

Kind regards,

Dr. Mónica Barrera

Vicepresident of the Mexican Academy of Engineering (AIM).

Ruth David.- CAETS
