Dear Colleague,

The world is changing rapidly, and now more than ever, the voice and influence of the National Academy of Engineering (NAE) are needed. We continue to respond to the COVID-19 pandemic and its effects, and provide actionable guidance to combat climate change and diversify the engineering profession. Your donation supports the people, systems, and culture that make up the engineering enterprise by enabling us to provide engineering leadership and insights for a complex world.

You strengthen the core values of independence, integrity, and commitment to diversity, equity, and inclusion that underscore our vision of a healthier, more secure, and sustainable world. **Join me in making a gift today to ensure this work continues to grow in its impact and influence.**

Your support strengthens our voice and empowers it to:

- **Nurture** the next generation of leaders through **The Grainger Foundation Frontiers of Engineering** and **Christine Mirzayan Fellowship**.
- **Convene** leaders in engineering to advance the human condition and respond to urgent challenges through the collective power of our members and volunteer experts.
- **Engage** with underrepresented youth and groups to encourage them to consider the rewards of an engineering degree and career through **EngineerGirl** and **Inclusive, Diverse, and Equitable Engineering for All**.
- **Advocate** for a culture of ethical and environmental responsibility in engineering through the **Cultural, Ethical, Social, and Environmental Responsibility in Engineering** initiative.

Your philanthropic support plays a critical role in everything we do. Whether you provide unrestricted support to the Independent Fund, program-specific funding to *EngineerGirl* or The Grainger Foundation Frontiers of Engineering, or contribute to our endowment funds to ensure long-term financial health, **you enable our voice to continue speaking out for all people and bring public awareness to the role of engineering in our daily lives.** Please donate today to ensure that we can continue this vital work.

Sincerely,

John L. Anderson
